

Ecovector Consulting

Helping implement sustainable energy

The energy world is undergoing rapid change

Public and private sector organisations the world over are having to face changes in the energy sector – for example:-

- Responding to the challenge of climate change
- Developing new directions for energy technologies due to concerns over security of supply
- Seeking economic development opportunities from the low carbon energy economy

Sustainable energy is key

Sustainable energy is the key to responding to these changes. But finding solutions that conserve resources, protect the local and global environment and enhance the people's quality of life is not easy.

Ecovector Consulting is ideally placed to provide strategy and technical advice to support sustainable energy implementation. We offer a co-ordinated approach to:

- Government departments and national energy agencies to develop suitable policies and programmes to meet international and national obligations on climate change
- Local authorities and regional government to develop and implement sustainable energy strategies
- Private sector companies to develop and exploit new commercial opportunities

Our experience and skills

Our staff have over 30 years of international business and energy research and consultancy work in the public and private sectors. Our skills and knowledge in sustainable energy development and energy policy analysis help clients to develop and implement energy strategies. In addition we provide a wide range of consultancy support, linked into our network of associates.

We provide skills and expertise in:

- Energy strategy and policy development
- Energy efficient and sustainable transport
- Advice and information on clean, alternative transport fuels
- Training in energy efficiency and renewable energy
- Monitoring and evaluation of energy strategy and policy implementation
- EC project management, proposal design and consortium building

Ecovector Consulting is a business name owned by Dr David Martin

Ecovector Consulting

Helping implement sustainable energy
